

Role: Security Engineer

Location: Huddersfield, West Yorkshire

Contract Type: Permanent following successful three month probation period

Salary: £21,000 to £24,000 per annum

Closing Date: Friday 22nd December 2017

The Role:

We are looking for a Security Engineer to join our small team of employees in Huddersfield.

Reporting to the Business Manager, the successful candidate must be motivated, eager to learn and have excellent customer service skills. A full UK driving licence is also required.

Experience with fire alarms, security systems, access control systems, CCTV systems and low voltage electrical or electronic equipment is essential. Knowledge of SSAIB regulations is preferred, however other regulatory body knowledge will be considered.

As an engineer your responsibilities will include;

- Service and maintenance of alarms and other related systems.
- Fault finding on alarms and other related systems.
- Installation of analogue and IP CCTV, intruder alarms, fire alarms and access control systems.
- Driving throughout West Yorkshire
- Communicating with customers and other staff members.
- Planning and working methodically from conception through to completion.

Who we are:

Founded in 1989, Armco Security is one of Yorkshires leading installers of intruder alarms, fire alarms and CCTV.

Armco have installed many thousands of systems over the years in homes and commercial properties including schools, offices, dental surgeries and medical centres. We offer the very latest technology in all our security and fire systems and provide 24 hour monitoring services with police response via an independent alarm receiving centre (ARC).

Armco are SSAIB UKAS accredited installers and we are proud to be holders of the SSAIB certificate of excellence.

We pride ourselves on our reputation for quality, value and after sales service and take care to ensure that we maintain the same values and attention to our customers that have sustained us over the last 25 years.

We are a social company and tend to organise events to suit all tastes. You will work with nice people who will help you when required, and will expect the same in return. We will provide you with a multitude of opportunities to learn (both formally and informally) and we will support you in developing your own career with us.
